Aditya Group CRM

Role-wise and Department-wise Feature Guide

Generated 14/9/2026

Report Summary

This document lists the current dashboard tabs, role permissions, department-specific fields, lead lifecycle, notification behavior, and reporting features of the Aditya Group CRM. Access is controlled by role, dealer, department, and assigned lead scope.

Dealers

Aditya Motors | Aditya Hyundai | Highway Honda

Core flow

Login -> Dashboard -> Leads -> Add Entry or assigned work -> Notifications -> Follow-up -> Reports -> Export -> Recycle or Restore

Dashboard Tabs by Role

These are the tabs currently configured in the application navigation.

Super Admin

Tabs	Dashboard, Leads, Models, Users, Reports, Performance, Login History, Recycle Bin, Theme, Backup & Restore
Access	All dealers, departments, users, master data, reports, settings, notifications, and system maintenance.

Admin

Tabs	Dashboard, Leads, Reports, Performance, Recycle Bin
Access	Permitted dealer leads, assignments, updates, reports, performance, and recycle-bin operations. Login History is Super Admin only.

Data Operator 1

Tabs	Dashboard, Leads, Add Entry, Reports
Access	Create and assign leads within configured scope, edit leads created by the operator, view scoped reports, and receive activity notifications.

Data Operator 2

Tabs	Dashboard, Leads, Add Entry, Reports
Access	Create and assign leads within the assigned dealer, edit leads created by the operator, view dealer-scoped reports, and receive activity notifications.

Department User

Tabs	Dashboard, Leads
Access	View assigned department leads and update status, remark, and next follow-up date. Reports and Add Entry are hidden.

Feature Catalogue

Functional features available across the CRM.

Workflows and Notifications

Role-aware business flows used by the CRM.

Lead creation	Data Operator -> Add Entry -> select dealer/brand/model -> select category/type -> resolve department -> assign users -> create lead.
Department update	Department User -> Leads -> assigned lead -> Department Update -> required status -> remark -> next follow-up -> Save Update.
Assignment notification	Assignment creates notifications for assigned users, Admin, and Super Admin. The actor is excluded from duplicate self-alerts.
Status and remark notification	Status or remark updates notify the managing Data Operator, Admin, and Super Admin.
Reporting	Authorized user -> Reports -> apply scope filters -> view charts/tables -> export PDF, Excel, or CSV.

Permission rules

- Super Admin has full system access across dealers, departments, users, models, reports, theme, and backups.
- Admin manages permitted lead data, reports, performance, history, and recycle-bin operations.
- Data Operators create leads and can edit leads they created; they cannot recycle leads.
- Department Users work only with assigned department leads and can update status, remarks, and follow-up dates.
- Exports, search, notifications, and APIs must respect dealer and department scope.
